Export af cacher til GPS via GSAK

Klik på GPS

Klik og hold
knappen nede på
"Send to GPS'r"
imens du trækker
den
op på speedbaren.

Slip og ikonet
sidder nu på
speedbaren.

The screenshot shows the GSAK software interface. At the top, there are menu items like 'PQ', 'Database', 'Locations', and 'Views'. Below these are dropdown menus for 'Select a saved filter' (set to 'NF Heming'), 'Database' (set to 'Default'), 'Locations' (set to '...N active'), and 'Views' (set to 'Default').

The main area is a table with columns: Container, Diff, Tern, Usort, Kommune, Region, Smart Name, Placed By, and Logs. The first row is highlighted in blue and contains the following data: Regular, 2.5, 1.5, Heming, Midtjylland, William, The Thomsens, 57.

Overlaid on the bottom right is a 'Customize Speedbar' dialog box. It has two panes: 'Categories' on the left and 'Available buttons' on the right. The 'GPS' category is selected in the 'Categories' pane. In the 'Available buttons' pane, the 'Send to GPSr' button (with a lightning bolt icon) is highlighted in blue. A red box with the text 'Click and Drag' is around this button, and a mouse cursor is pointing at it. A red circle is drawn around the 'GPS' category in the 'Categories' pane. Below the dialog box, there is a small text box that reads: 'To add command buttons, drag and drop buttons onto the SpeedBar. To remove command buttons, drag them off of the SpeedBar.'

Export af cacher til GPS via GSAK

- Lav et filter med de cacher du vil overføre.
- Klik på det gule lyn i toppen.
- I cirklen kan du se antal wp som vil blive overført.

The screenshot shows the 'Send Waypoints to GPS' dialog box in GSAK. The title bar indicates '(Total = 141)'. The dialog is divided into several sections:

- GPS Symbols (Not all symbols are supported on all GPSs):** Lists various cache types and their corresponding symbols, such as 'Found = Geocache Found', 'Placed = Residence', etc. A 'Change Symbols' button is present.
- Send options for Generic USB:** Includes a 'Use Defaults' checkbox (checked), 'Include additional child waypoints' options (Yes checked), and 'Waypoint name' settings (e.g., '%smart', 14 characters).
- Settings:** A dropdown menu showing 'Last active', 'Save', and 'Delete' buttons.
- Buttons:** 'Send' (yellow lightning bolt), 'GPSr Setup', 'Cancel', and 'Help'.

A red circle highlights the '(Total = 141)' text, and a red arrow points to the 'Send' button.
