

Open street maps på GPSén

Gå ind på <http://garmin.openstreetmap.nl/>
Siden er lang tid om at loade, så hav tålmodighed.

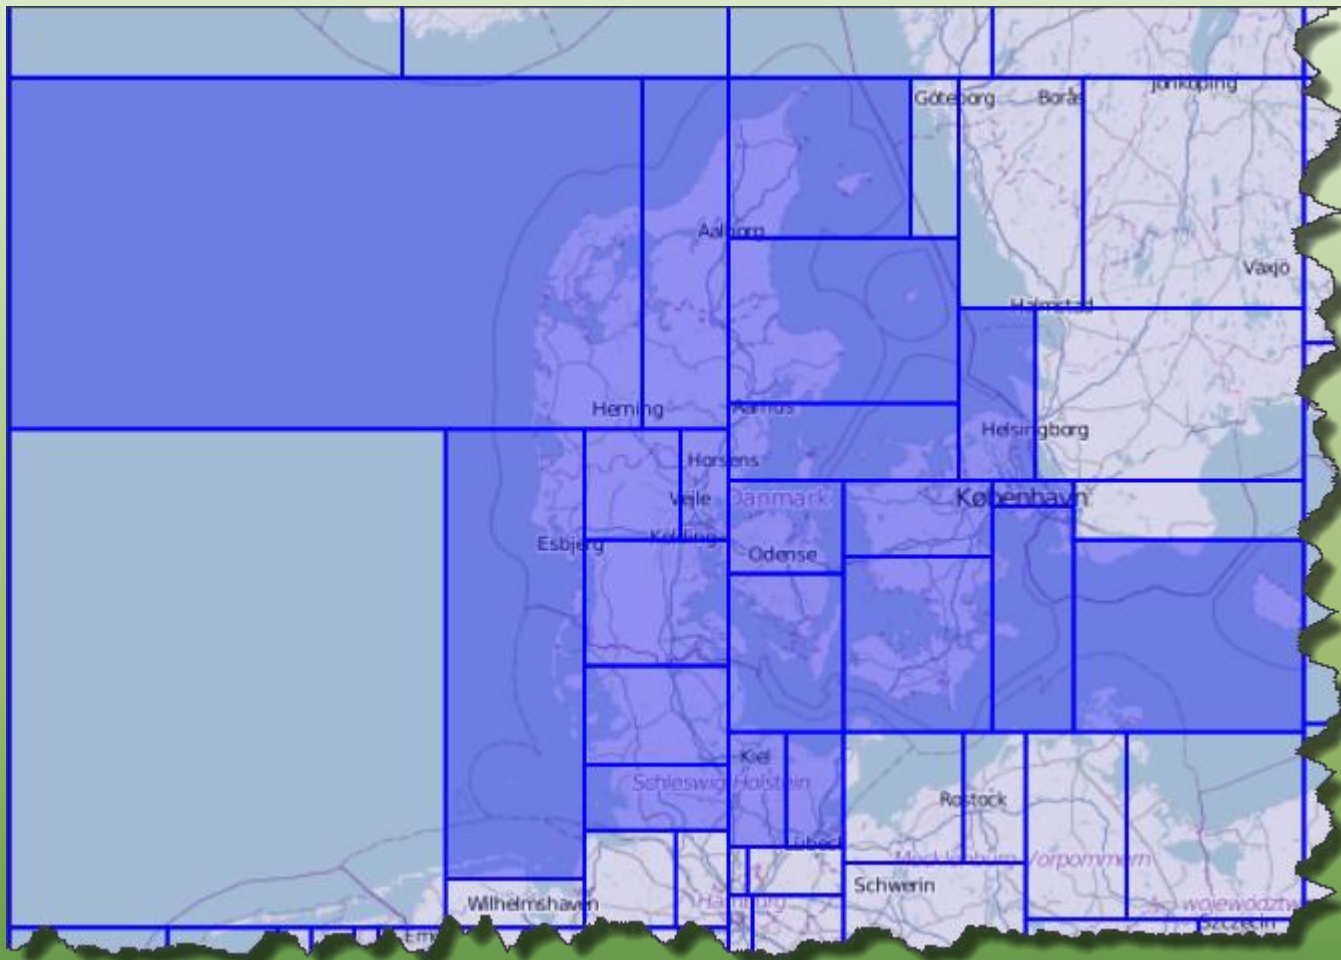

Fra rullemenuen under Europa vælges Danmark

 Perhaps you'd like to add some additional files?

Enable manual tile selection: , then use the map below to add and remove tiles to the selection.

 Request your map or download it directly:

Hvis du ønsker det kan du ved at sætte flueben i "Enable manuel tile selection" tilføje kort over andre områder f.eks. Nord Tyskland

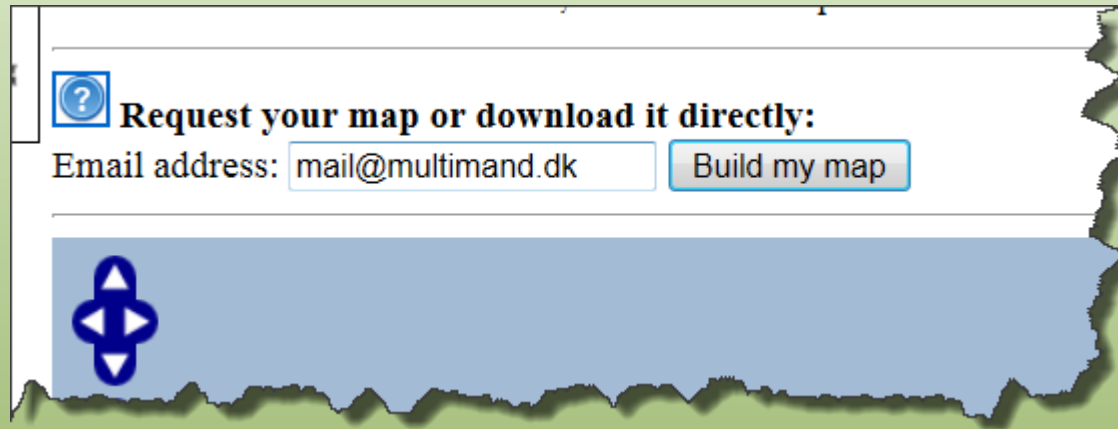

Klik på de felter af kortet du ønsker at få med.

Server status:

	Country	Custom	
Queue length:	0	95	request(s)
Request delay:	~6 minutes	~9.6 hours	

Nederst på siden kan du se hvor lang tid det forventes at tage før dit kort er klar. I dette tilfælde vil det tage 6 min. Før kortet er klar hvis du bestiller et færdigt kort til et land uden ekstra felter.

Indsæt din emailadresse og tryk på "build my map"

Du får herefter besked om at du vil modtage 2 emails.

Free routable maps for Garmin brand GPS devices

Combine maps request accepted

You will receive two emails:

- One email containing a link to a webpage where you can track the status of your request which will be sent immediately.
- One email containing the download location for the MapSource installer, RoadTrip installer and gmapsupp.img when the server has processed your request.

There are currently 1 requests in the queue...

The email containing the tracking URL is successfully sent.

[Go back](#)

Den første mail, giver adgang til en side hvor du kan se hvor langt dit ønskede kort er kommet.

Hi,

You successfully requested a Garmin map on <http://garmin.openstreetmap.nl>.

Below you find a link to a webpage that shows the current status of your request.

<<http://osm2.pleiades.uni-wuppertal.de/garmin/status.php?id=cdbbf948d67d17d866efdd484eaac1cb>>

Note: Your map will only be available for 48 hours. Please make sure to check your mail often enough so you won't miss the download window.

Regards,

Til: mail@multimand.dk;

Hi,

Your request for a Garmin map on garmin.openstreetmap.nl is ready.

The server has generated four different configurations of your map:

- * _windows.exe = Installer for Garmin BaseCamp/MapSource (Windows).
- * _macosx.zip = Installer for Garmin BaseCamp/RoadTrip (Mac OSX)
- * _gmapsupp.zip = Combined image for direct manual placement on the GPS device (gmapsupp.img)
- * _tiles.zip = A zip file containing the tiles in the request, especially useful for Linux users (e.g. QLandkarte)

Please browse to the website listed below and download the map configuration(s) you're interested in. Your request will be available on the server for 48 hours before it's deleted.

Click Here

<http://garmin.openstreetmap.nl>

If you try to download your map but get the message '404 Not Found' and you are sure to have requested the map less than 48 hours ago, then this is probably because of the following three options:

- 1) Please take a close look at the url in the email above as it is possible that a section of the url is on the next line. If this is the case then you have to copy/paste the url sections in the browser address bar (without the '<' and '>' characters).
- 2) The download window has passed and the server deleted your request to make room for other requests. If you tried to download around 48 hours after you received the email (check the timestamps in the headers) then this is most probably the cause, you can simply request your map again (and make sure you download soon after you've received the email).
- 3) A problem occurred while building the map. Please reply to this email (and include this email) stating that your map request has failed. Thanks!

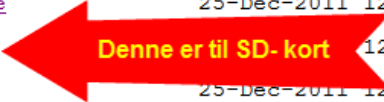

These maps are created with OpenStreetMap data and hosting is sponsored by Oxilion. If you enjoy this service then please consider contributing to OpenStreetMap (http://wiki.openstreetmap.org/wiki/Beginners%27_guide) and/or using Oxilion for your hosting needs (<http://www.oxilion.nl>)

Man bliver derefter viderestillet til en ny side hvor kortet ligger klar til download. Kortet er tilgængelig i forskellige formater, alt efter hvad det skal bruges til. Vi skal bruge den til Micro-SD.

Når man klikker på tekst-strengen får man mulighed for at downloade filen til computeren via "Gem som". Gem den på computeren et sted hvor du kan finde den igen.

Find filen på computeren, højreklik og vælg Extract to OSM.....

Gå ind i mappen og omdøb filen. Kald den noget som relaterer til Open street map F.eks. OSM_DK

Kort-filen lægges i mappen Garmin på gps'ens micro-SD kort. Hvis der ingen mappe er med navnet Garmin, oprettes der en' og den døbes garmin
