

# Lave PQ'er over hele Danmark

- Hele Danmark kan pt laves i 21 stk PQ'er á 1000 stk. ved hjælp af dato intervaller.
- På [http://geowiki.wegge.dk/wiki/Pocket\\_query](http://geowiki.wegge.dk/wiki/Pocket_query)
- Er der lagt links op den fordelingen.
- Vi skal nu lave dem som PQ'er til os selv.

# Lave PQ'er over hele Danmark

- Det eneste vi behøver at gøre er at scrolle ned i bunden og klikke på "Submit Information"

The screenshot displays a web interface for creating a Pocket Query (PQ) over Denmark. At the top, there is a grid of 40 icons representing various activities and locations, such as a bicycle, a motorcycle, a tractor, a horse, a campfire, a tent, a stroller, a cross, a car, a key, a bus, a person, a UV symbol, a bottle, a crossed-out sign, a graph, a moon, a person, a house, distance markers (<1 KM, <10 KM, >10 KM), a fuel pump, a fork, a signal tower, and a handshake. Below the icons is the 'Output To' section, which includes an 'E-Mail' dropdown menu set to 'geojensk@gmail.com (Primary)', a link to 'Add an Additional E-Mail Address to Your Account', a 'Format' dropdown menu set to 'GPS Exchange Format (\*.gpx)', and a link to 'Learn More About Waypoint Downloads'. There are also two checked checkboxes: 'Compress files into \*.zip format (recommended)' and 'Include Pocket Query name in download file name'. At the bottom, there are two buttons: 'Submit Information' and 'Delete This Query'. A red box highlights the 'Submit Information' button with a red arrow pointing to it and the text 'Click Here'.
